DAY 6: NAKURU- NAIVASHA-MASAI MARA -

Early morning breakfast and depart for Mara

Ascending through the western wall of the Great Rift Valley floor, we reach arguably Kenya's most celebrated natural attraction-The Masai Mara game reserve. A 1,500 sq. km slab of open Savannah dotted with acacia trees-the Kenyan section of the wildly beautiful Serengeti plains, teems with wildlife. Being in the Mara has been described by some authorities as "being in the New York of the natural world"

You will spend the next **02 nights here to** explore.

The Mara offers wildlife in such variety and abundance that it is difficult to believe: over 450 species of animals have been recorded here. You will easily see lions, rhinos, hippos, crocodiles, giraffe, wildebeests, zebras, buffalo, warthogs, hyenas, jackals, wild dogs, buffalo, leopard, many kinds of antelopes and elephant. It is in the Mara that perhaps the most spectacular event of the natural world takes place. This is the annual migration of millions of wildebeest and zebra from the Serengeti (Tanzania) in search of water and pasture. Following on their heels are the predators of the savanna- lion, cheetah, wild dog, jackal, hyena and vultures.

The endless plains of East Africa are the setting of the World's greatest spectacle-the pounding of over 6 million hooves! From the vast Serengeti plains to the Champagne coloured hills of Kenya's Masai Mara. Over 1 million wildebeest, 300,000 Thompson gazelles and some 200,000 zebras relentlessly tracked by Africa's greatest predators, migrate in a clockwise fashion over 1,800 miles each year in search of green pastures.

This continual perilous trek in search of nature's big green carpet involves no beginning or end to a wildebeest journey. Its life is an endless pilgrimage, a continual search of food, water and pasture. The only beginning is at birth. An estimated 400,000 wildebeest calves are born during a six week period early each year-usually between late January and Mid March.
